Art Unit: 2171

This is in response to application filed July 06, 2001 in which claims 1-9 are presented for examination.

Status of Claims

Claims 1-9 are pending.

Information Disclosure Statement

The information disclosure statement filed January 25, 2002 is in compliance with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609. It has been placed in the application file and the information referred to therein has been considered as to the merits.

Claim Objections

Claims 1, 4 and 7 are objected to because of the following informalities: These claims failed to be a complete sentence. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2171

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-39 of U.S. Patent No. 6,560,593. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the present application and the U.S. Patent 6,560,593 disclose method steps of copying an original table, replacing the reference to the original table with a reference to the virtual table, determining a new optimization plan for the query; and providing a virtual index associated with the virtual table. The preamble of the U.S. Patent is "a method for determining changes to an original optimization plan for a query"; whereas the preamble of the present application recites "a method for viewing changes to an original optimization plan for a query", they are therefore not patentably distinct from each other since the body of the claims do not fully and intrinsically sets forth all of the limitations of the claimed invention, and the preambles merely state the purpose or intended use of the invention, rather than any distinct definition of any of the claimed invention's limitations, then the preambles are not considered a limitation and is of no significance to the claims construction. *Pitney Bowes, Inc. v. Hewlett-Packard Co.*, 182 F.3d 1298, 1305, 51 USPQ2d 1161, 1165 (Fed. Cir. 1999). See also *Rowe v. Dror*, 112 F.3d 473, 478, 42 USPQ2d 1550, 1553 (Fed. Cir. 1997). Further, in this instance, it would have been obvious to one of ordinary skill in the art at the time of the invention to have viewed changes to an original optimization plan for a query after a change has

Art Unit: 2171

been determined to an original optimization plan because that is essential for providing a user friendly environment.
